Is there any recipe for success? Keep your confidence high however it must be backed up by not only knowledge and experience, but also action! Well, now you can get started.

*Krzysztof Bielicki*

# PrimeStone Coin

# Your Sound Investment

The PSC team would like to introduce the PrimeStone Coin. The new PSC is based on PoS/MN consensus. This new medium of exchnage ensures a high level of security as well as smooth and cheap transactions.

# Visit the world of PrimeStone possibilities.

## ABOUT PSC

During first step of the project the PrimeStone Coin has been created. The new PrimeStone Coin applies Proof-of-Stake (PoS) protocol. PoS users, so-called “stakers”, as well as MasterNode owners obtain rewards clearly defined by the Reward Plan. The PrimeStone Coin remains a MasterNode coin, however, currently the MN collateral has increased to 10.000 PSC.

Moreover, PrimeStone has released a set of new wallets adapted to the new PSC version: Windows Wallet, Linux Wallet, Android Wallet and MacOS Wallet.

To protect the best interests, comfort and safety of our users, the PrimeStone Team has implemented some significant features, such as Unique Address Format, SegWit, Replay Protection, Zero Knowledge Proof, etc.

# Change
# Has Come

Presented changes were implemented in January 2019.

01

**MasterNode Collateral Change**

The collateral is increased from 1.000 PSC to 10.000 PSC

02

**PoS/MN**

The consensus is changed from PoW/MN to PoS/MN

03

**New Features**

The following features are applied: SegWit, Replay Protection, Zero Knowledge Proof

# User
# Benefits

- high safety level
- high speed transactions
- low fee level
- PoS and MN rewards

# platforms

# NEW COIN PLATFORM

PrimeStone introduces this **intuitive** and **easy-to-use** tool enabling new cryptocurrencies creation. All users shall be given an opportunity to develop their own digital currency, without any programming skills or IT knowledge.

# PRIMESTONE

The PrimeStone Platform is an **intuitive** tool that generates new cryptocurrencies based on PSC source code. It is an **innovative** and perfect solution for those who would like to do something more than possessing coins. For the first time in history, programming skills are **not required** to enter the world of digital currencies not only as a holder but also as an **owner** of your own, original cryptocurrency.

# User Benefits

- the possibility of developing one's own ideas and implementing them successfully
- low production cost
- short implementation time

# ICO PLATFORM

The ICO Platform enables users to create their own ICO. This is an **innovative** solution that **protects** both sides of transactions – investors and authors of the projects. PrimeStone provides the solution which is **satisfactory** for every user.

# PRIMESTONE

The purpose of the ICO Platform is to **support** teams in fundraising campaigns in a relatively **simple** way. More importantly, however, the ICO Platform aims to **protect** both parties of a transaction. If any project turns out to be fraud, investors obtain the refund equal to the invested resources.

# User Benefits

## FOR PROJECTS

- raising funds for further development
- ease of use
- advertising
- high safety level

## FOR INVESTORS

- ease of use
- high safety level
- the prospects of profit in return

# BLOCKCHAIN PLATFORM

The platform contributes to the **development** of the Blockchain technology. It is the **intuitive** tool that significantly **simplifies** the introduction of the Blockchain Technology for commercial purposes.

# PRIMESTONE

The PrimeStone Blockchain Platform is designed to **popularise** commercial usage of the Blockchain Technology. The main objective of the platform is to allow each economic entity to **exploit** Blockchain for the needs of **businesses**. At the same time, users – mentioned entities – demonstrate their potential and contribute to the growth of the Blockchain Technology.

# User Benefits

- ease of use
- capital savings
- time savings
- a possibility to verify requirements for the system

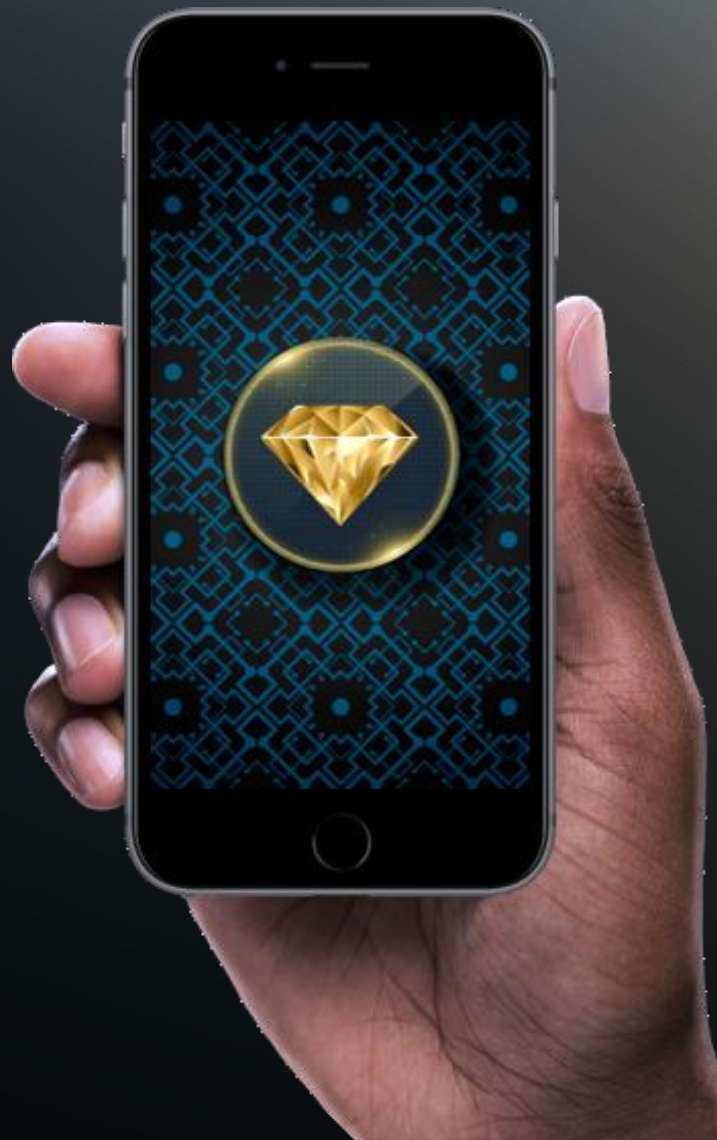
# crypto payments

# Crypto
# Payments

The PrimeStone Team takes all appropriate measures to develop a new **cryptocurrency exchange**, and then a new **wallet** for mobile devices. The **wallet** will enable **crypto payments** for everyday expenses in stationary shops.

# Crypto Payments

A unique solution for non-standard payment methods.



PSC remains a mere medium of exchange, which to a very limited extent allows the purchase of material goods.

In response to this problem, the mobile **wallet** for **crypto payments** will be developed. Users will have the possibility to make payments with **each** digital currency listed on the PrimeStone Crypto Exchange.

# Let us imagine…

You would like to have a bite of chocolate…

# User Benefits

## FOR CRYPTO EXCHANGE USERS

- ease of use
- high safety level
- the prospects of profit

## FOR WALLET USERS

- ease of use
- high safety level
- attractive exchange rates
- possibility to choose the currency of payment

# roadmap

# Roadmap
## Timeline

- Negotiations with crypto exchanges
- Work on PSC changes implementation
- PSC community development

August 2019

**New Coin Platform**

The completion of the Platform development phase

September 2019

**ICO Platform**

The completion of the ICO Platform development phase

Q2 2020

**Blockchain Platform**

The completion of the Blockchain Platform development phase

## Crypto Payments

The introduction of the crypto exchange and wallet for crypto payments
